

Metedeconk National Golf Club Presents...

# THE COTTAGE GOLF SCHOOL

Hosted By Preston Combs, Teaching Professional  
and Dennis Kwon, Guest Instructor

*Friday, June 19th and Saturday, June 20th*

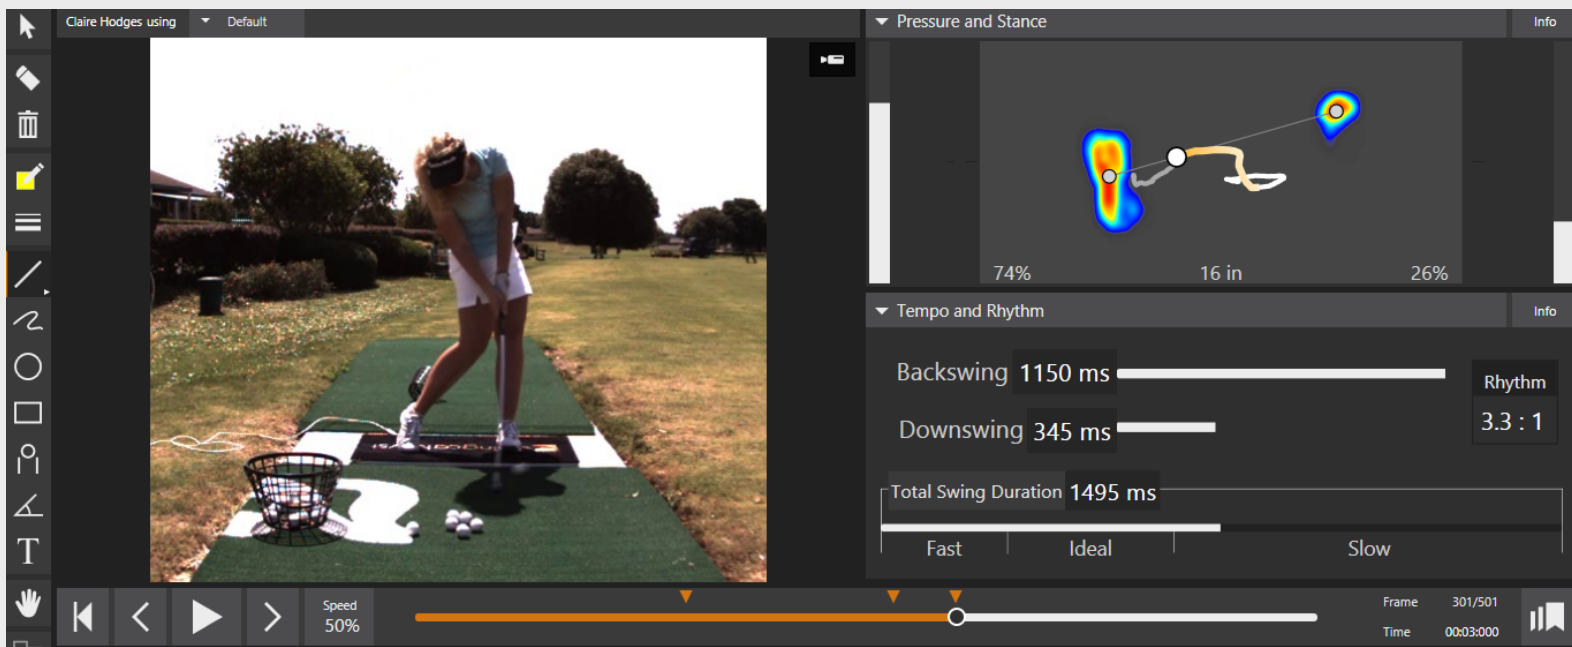

# *The Cottage Golf School Metedeconk National's Most Exclusive Instructional Event*

*You and up to three guests will enjoy the Metedeconk Experience unlike ever before with a round of championship golf, an overnight stay at The Lodge Cottage, and the game's finest instruction and technology in this all inclusive package.*

Using SwingCatalyst, you will see how the weight and pressure move in your swing and cause different ball flights. The best players not only have their weight forward at impact, but get it there effectively to hit it further and straighter. We can help you do that too.

On the greens, many of the world's top tour professionals are trusting AimPoint Express Green Reading. The first phase of being a great putter is picking the correct target. Now is your chance to read greens like the best in the world and start making more putts today.

# TRACKMAN

Q

**How often do you get on TrackMan and check the numbers?**

I own one, and I'll use it regularly. I used it quite a lot to dial in some of my wedge distances going into Pinehurst. When I was struggling with my swing a little bit last year, I started using it a lot. It's a really helpful tool if you use it correctly.

The impact of a golf shot lasts four thousandths of a second! That's less than the blink of an eye deciding if you will hit a fairway or green.

With TrackMan technology, we can see impact, how and why your golf ball curves, and ensure you are doing everything you can to hit better shots more consistently.

The game's best trust TrackMan. Take advantage of a chance to hit on it yourself and play your best golf ever.

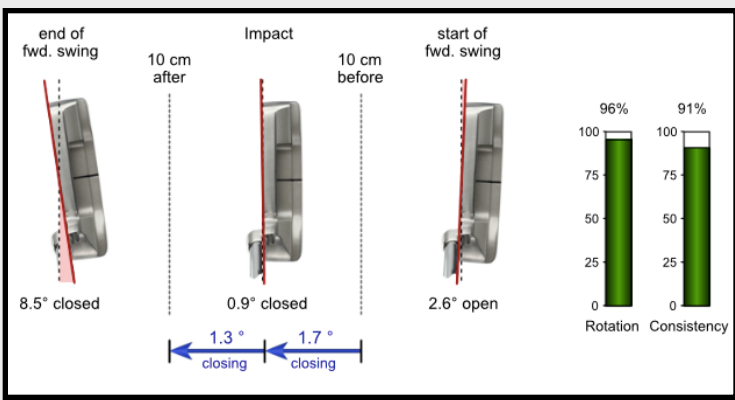

The SAM PuttLab will allow you to look at your putting stroke in an entirely new light. With 3D ultrasound technology, we can see all the parts of stroke including the face at address, impact, and rhythm, and tempo.

Didn't think there was a way to learn touch and feel on the putting green? There is now. And it is your key to better strokes and lower scores.

It is part of the best technology for the best Cottage Golf School in the northeast. It's time to reserve your spot today!

## *Schedule of Events*

### Friday, June 19th
